Mouse Anti-Bacteria Tannerella Forsythia Monoclonal Antibody

Mouse, Monoclonal (Tannerella Forsythia)
Cat. No. DMAB9454
Lot. No. (See product label)

**PRODUCT INFORMATION**

**Product Overview:** Mouse monoclonal antibody to bacteria Tannerella forsythia.  
**Immunogen:** Tannerella forsythia strain FDC 331 (OMZ 348), subgingival plaque from human oral cavity, strain donated by Dr. A. Tanner, Forsyth Dental Center, Boston, M  
**Host Animal:** Mouse  
**Isotype:** IgG2b  
**Applications:** Immunoblotting; Purification  
**Species Specificity:** Tannerella forsythia

**ANTIGEN BACKGROUND**

**Introduction:** Tannerella forsythia is an anaerobic, gram negative species of bacteria of the Cytophaga-Bacteroidetes family implicated in periodontal diseases. T. forsythia, sometimes referred to by previous names (including Bacteroides forsythus and Tannerella forsythensis), is a member of the red complex of periodontal pathogens.  
**Keywords:** Tannerella forsythia; T. forsythia; Bacteroides forsythu; Tannerella forsythensis
